

Biosystems Engineering

College of Engineering

Biosystems engineering provides an essential link between the biological sciences and the engineering profession. This linkage is necessary for the development of production and processing systems involving biological materials that preserve our natural resource base. Students have the latitude to develop an area of specialization relating to environmental engineering, biotechnology, food processing, machine systems, or controlled environment engineering. The curriculum is also ideal preparation for those students wanting to pursue a graduate or professional degree in biomedical engineering or veterinary medicine through the pre-biomedical and pre-veterinary medicine options.

The curriculum in biosystems engineering is administered jointly by the College of Engineering and the College of Agriculture. Graduates earn the Bachelor of Science in Biosystems Engineering degree.

Admission to the degree program is selective. Students should refer to the UK *Bulletin* for general information concerning admission and graduation requirements.

Degree Requirements

In addition to fulfilling UK Core and College of Engineering requirements, students must complete the biosystems engineering curriculum. The following curriculum meets the requirements for the B.S. degree.

Freshman Year

First Semester	Hours
EGR 101 Engineering Exploration I Δ §	1
EGR 102 Fundamentals of Engineering Computing	2
CHE 105 GenColChem I CHE 105 or 170 or PHY 231 GenUnivPhy PHY 231 ●	4
PHY 241 General University Physics Laboratory PHY 241 †	1
CIS/WRD 110 Composition and Communication I ENG 101	3
MA 113 Calculus I MA 113, MAT 174, 175 or MT 175	4
Second Semester	
EGR 103 Engineering Exploration II Δ	2
CIS/WRD 111 Composition and Communication II ENG 102 or 105	3
MA 114 Calculus II MA 114, MAT 184, 185 or MT 185	4
PHY 231 GenUnivPhy PHY 231 or CHE 105 GenColChem I CHE 105 or 170 ●	4
UK Core (Social Sciences)	3

Sophomore Year

First Semester	Hours
BAE 201 Economic Analysis for Biosystems	2
BIO 148 Introductory Biology I BIO 114 or 150	3
MA 213 Calculus III MA 213, MAT 213 or MT 275	4
CHE 107 Gen College Chemistry II CHE 107 or 180	3
UK Core (Humanities)	3
CE 106 Computer Graphics and Communication CAD 102 & 112	3
Second Semester	
BAE 202 Statistical Inferences for Biosystems Engineering	3
MA 214 Calculus IV MA 214, MAT 214 or MT 285	3
ME 220 Engineering Thermodynamics I ME 220	3
EM 221 Statics	3
PHY 232 General University Physics PHY 232	4
PHY 242 General University Physics Laboratory PHY 242	1

Students who take ENG 101 and ENG 101 or 105 should also take one of the following: COM 181, 252, 281, 287.

Junior Year

First Semester	Hours
CE 341 Introduction to Fluid Mechanics	4
EE 305 Electrical Circuits and Electronics	3
EM 313 Dynamics	3
BIO 152 Principles of Biology II BIO 116 or BIO 152	3
WRD 204 Technical Writing ***	3
Second Semester	
ME 325 Elements of Heat Transfer	3
BAE 305 DC Circuits and Microelectronics	3
EM 302 Mechanics of Deformable Solids	3
Biological Science Elective BIO 208, 225, 226, 227, BSL 212, 214, or CLT 205 & 206	3
Biosystems Core Elective*	3

Senior Year

First Semester	Hours
BAE 402 Biosystems Engineering Design I	2
BAE 400 Senior Seminar	1
Biosystems Core* or Technical Electives**	3
Biosystems Core* or Technical Electives**	3
Biosystems Core* or Technical Electives**	3
Technical Electives** CHE 270 or 236	3
UK Core (Citizenship – USA)	3
Second Semester	
BAE 403 Biosystems Engineering Design II	2
ME 340 Introduction to Mechanical Systems	3
Biosystems Core* or Technical Electives**	3
Biosystems Core* or Technical Electives**	3
Supporting Elective†	3
UK Core (Global Dynamics)	3

*A minimum of 9 hours are required from the biosystems engineering core courses: BAE 417 Design of Machine Systems, BAE 427 Structures and Environment Engineering, BAE 437 Land and Water Resources Engineering, and BAE 447 Bioprocess Engineering Fundamentals.

**A minimum of 12 hours are to be taken in addition to the 9 core hours selected by the student. The technical electives allow the student an opportunity to concentrate or gain depth in one or more of the various specialty areas of biosystems engineering. The technical electives must be selected from the courses listed below and approved by the student's academic advisor. Other courses may be considered, each on its individual merit.

***Graduation Composition and Communication Requirement (GCCR) course.

Approved technical electives: BAE 435G, 438G, 450, 503, 504, 505, 506, 515, 517, 532, 536, 537, 538, 541, 549, 580, 599; BCH 401G; BME 301, 481G, 488, 501, 530, 599; CE 211, 351, 451, 461G, 471G, 525, 551; CHE 230, 236; CME 599; EE 402G; FSC 434G, 530, 536, 538; ME 321, 344, 440, 501, 503, 513, 532; PGY 412G; NRE 556; GEO 451G; EES 530, 585; EGR 599.

†Supporting electives are any University course excluding more elementary versions of required courses such as pre-calculus math or PHY 211.

Δ Both classes must be taken to fulfill UK Core: Arts & Creativity requirement.

● Based on advisor consult

§ Transfer students who declare a major will take EGR 112 Engineering Exploration for Transfer Students in place of EGR 101.

‡ Only if enrolled in PHY 231.

University of Kentucky is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award associate, baccalaureate, masters, and doctorate degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097, call 404-679-4500, or online at www.sacscoc.org for questions about the accreditation of University of Kentucky.

Chemical Engineering

College of Engineering

A foundation in mathematics, chemistry, and physics is required for the study of chemical engineering. Fundamental principles related to the transformation of matter and energy are developed in subjects including thermodynamics, fluid flow, separations, heat and mass transfer, reactor design, and chemical process design. Undergraduate electives are available in biopharmaceutical engineering, energy and fuels, environmental engineering, and materials engineering and nanotechnology. A program is also available to fulfill pre-medical requirements simultaneously with requirements for the B.S. in chemical engineering.

Admission to the degree program is selective. Students should refer to the UK *Bulletin* for general information concerning admission and graduation requirements.

Degree Requirements

In addition to fulfilling UK Core and College of Engineering requirements, students must complete the chemical engineering curriculum. The following curriculum meets the requirements for the B.S. degree.

Freshman Year

First Semester	Hours
EGR 101 Engineering Exploration I Δ §.....	1
EGR 102 Fundamentals of Engineering Computing	2

Supportive Elective **	3

Δ Both classes must be taken to fulfill UK Core: Arts & Creativity requirement.

*Graduation Composition and Communication Requirement (GCCR) course.

** Supportive Elective (3 credits) can be any course that carries college credit and is not a more elementary version of a required course. The student completing 3 co-op tours (EGR 399) may count the co-op experience toward the supportive elective.

• Based on advisor consult

§ Transfer students who declare a major will take EGR 112 Engineering Exploration for Transfer Students in place of EGR 101.

†Engineering/Science Elective Structure. Students must select four courses as follows:

1. Chemical engineering elective (CME 395, 404G, 505, 515, 542, 554, 556, 580, 599) [CME 395 (3 credits) can be used to satisfy only one elective Requirement]

CONTINUED

Chemical Engineering

College of Engineering

2. *Science/math elective (totaling three or more credit hours**) that is not a more elementary version of a required course. [Students may combine multiple qualifying courses that total 3 credits (e.g. pre-medical students may wish to combine PHY 241, 242 and CHE 233)]*
 - a. *Math (MA 321, 322, 416G, 432G, 433G, 471G, 481G)*
 - b. *Chemistry (CHE 226, 250, 510 and above)Biology (BIO 148 and above)*
 - c. *Physics (PHY 241 and above)*
 - d. *Other courses by approval of Director of Undergraduate Studies*
3. *Engineering elective (level 300 and above) that does not significantly duplicate content in a core chemical engineering course (e.g. ME 330) OR a CME Elective (CME 395 and above).*
4. *Chemical engineering elective (CME 395 and above) OR one engineering elective (level 300 and above) OR one science/math elective as described above.*

Civil Engineering

College of Engineering

A civil engineering curriculum provides a strong foundation for entry into the profession or graduate school. Major areas include construction engineering and project management, environmental engineering, geotechnical engineering, materials engineering, structural engineering, transportation engineering, and water resources engineering.

Admission to the degree program is selective. Students should refer to the UK *Bulletin* for general information concerning admission and graduation requirements.

Degree Requirements

The following curriculum meets the requirements for a B.S. in Civil Engineering, provided the student satisfies UK Core and College of Engineering requirements.

Freshman Year

First Semester	Hours
EGR 101 Engineering Exploration I Δ §	1
EGR 102 Fundamentals of Engineering Computing	2
CHE 105 GenColChem I CHE 105 or 170 or PHY 231 GenUnivPhy PHY 231 ●	4
PHY 241 General University Physics Laboratory PHY 241 ‡	1
CIS/WRD 110 Composition and Communication I ENG 101	3
MA 113 Calculus I MA 113, MAT 174, 175 or MT 175	4
Second Semester

CE 429 Civil Engineering Systems Design	3
CE Design Elective [4]	3
Technical Elective [5]	3
Supportive Elective [6]	3
UK Core (Global Dynamics)	3

[1] To be chosen from ME 220 or EM 313.

[2] Math or Science Elective Options: MA 321, MA 322, MA 416G, MA 432G, BIO 208, CHE 230, CHE 236, EE 305, GEO 409, EES 550, EES 585, MNG 551, or the other half of the Engineering Science Elective in [1]. NOTE: MA 322 is required for a math minor.

[3] To be selected from: CE 482 or CE 486G.

[4] Students are required to select two design electives from different areas. Choose from: CE 508, CE 531 or CE 533, CE 534, CE 549, CE 551, CE 579, CE 589. **Design elective courses are typically taught once a year.**

[5] Technical Elective is chosen from any of the courses at the 300-level or above that carry a CE prefix and in which a student is qualified to enroll, exclusive of required courses. **Engineering elective courses are typically taught once a year.**

[6] Supportive elective is to be chosen from any University course, excluding a more elementary version of a required course, such as precalculus mathematics or PHY 211. However, each CE area has at least one recommendation for the supportive elective. Please review the Optional Concentration section in the Civil Engineering Undergraduate Handbook. The supportive elective can be taken pass-fail.

Δ Both classes must be taken to fulfill UK Core: Arts & Creativity requirement.

● Based on advisor consult

‡ Only if enrolled in PHY 231

*Graduation Composition and Communication Requirement (GCCR) course.

Computer Engineering

College of Engineering

Computer Engineers shape the way people work, play, live and learn in the modern world and develop the infrastructure and devices people can't imagine living without. Computer Engineering is a dynamic and rewarding field that draws upon Electrical Engineering and Computer Science. Computer Engineers solve today's most challenging technology problems by applying their expertise in both hardware and software systems. Leveraging everything from the world's smallest micro-controllers to the largest server farms on the planet, Computer Engineers have revolutionized modern entertainment, medicine, telecommunications, transportation, and Information Technology. Computer Engineering graduates find employment in positions requiring Computer Science, Electrical Engineering or Computer Engineering expertise, are in high demand in virtually all industries, and are among the highest compensated specialties in engineering. Admission to the degree program is selective. Students should refer to the UK *Bulletin* for general information concerning admission and graduation requirements.

Degree Requirements

In addition to fulfilling UK Core and College of Engineering requirements, students must complete the computer engineering curriculum. The following curriculum meets the requirements for the B.S. degree.

Freshman Year

First Semester	Hours
EGR 101 Engineering Exploration I Δ §	1

Computer Science

College of Engineering

The computer science program prepares students to identify computational problems in all areas of modern life, to design, implement, and analyze algorithmic solutions, and to build software for a variety of applications. Through required, elective and special topics courses students are exposed to the foundations and current practices of computing and algorithms, software engineering, programming languages, operating systems, graphics and multimedia, scientific computing and numerical analysis, databases, artificial intelligence and networks.

Admission to the degree program is selective. Students should refer to the UK *Bulletin* for general information concerning admission and graduation requirements.

Degree Requirements

In addition to satisfying UK Core requirements, each student completes the following:

Freshman Year

First Semester	Hours
EGR 101 Engineering Exploration I Δ §	1
EGR 102 Fundamentals of Engineering Computing	2
CHE 105 GenColChem I CHE 105 or 170 or PHY 231 GenUnivPhy PHY 231●	4

CS Elective [C]	3
Technical Elective [T]	3
Non-Technical Elective[E]	3
Free Elective[E]	3

[N] – Any natural science course excluding more elementary versions of completed required courses.

[C] – Computer Science Elective (18 credit hours) – include 300-level and above computer science courses with at least three to be selected from: CS 335, CS 378, CS 405G, CS 441G, CS 450G, CS 460G and CS 463G. Students are encouraged to take advantage of special topics courses, cooperative education, independent studies and undergraduate research.

[T] – Technical Elective – include any 300-level and above courses in computer science, electrical engineering, mathematics and business and economics. MA 214 is also an acceptable technical elective. Cooperative education credit may be used to satisfy this requirement.

[E] – Elective – including one Free Elective and Non-Technical Elective. At least two of the electives (6 credits) cannot be in computer science, mathematics, science or engineering. Free Elective (3 credits) can be any course that carries college credit and is not a more elementary version of a required course. Note: At least 128 credit hours; a foreign language requirement.

[S] – Science Elective – must be selected from either UK Core Natural Science or Social Science approved list or by consent of academic advisor.

Δ Both classes must be taken to fulfill UK Core: Arts & Creativity requirement.

*Graduation Composition and Communication Requirement (GCCR) course.

● Based on advisor consult

Computer Science

The Academic Minor

Many departments have designed academic minors for the convenience of undergraduate students.

A minor is a structured group of courses that leads to considerable knowledge and understanding of a subject, although with less depth than a major. Some employers consider minors desirable, and the corresponding major requirements at the University may stipulate a minor. Some students choose to complement their major program with a minor in a related field or even in an entirely different field of interest. Students interested in pursuing an academic minor should contact their college dean's office and the department responsible for the minor program for guidance and advising.

Please note that undergraduate students can only complete a minor *in addition to* and as *a complement to* a major. The University does not award stand-alone minors.

Minor in Computer Science

The minor in computer science requires a minimum of 19-20 hours of course work in CS, to include the following:

EGR102 (2) or CS 115 (3), CS 215 (4), CS 216 (3), CS 275 (4), CS 315 (3), or equivalent, plus three additional hours of upper-division courses (300 or higher) in computer science. A GPA of at least 2.5 across these courses is required. At least 10 of the credit hours required to complete the minor must be earned at the University of Kentucky.

Electrical Engineering

College of Engineering

The electrical engineering degree program seeks to produce graduates who are trained in the theory and practice of electrical and computer engineering and are well prepared to handle the professional and leadership challenges of their careers. The program allows students to specialize in high performance and embedded computing, microelectronics and nanotechnology, power and energy, signal processing and communications, high frequency circuits and fields, and control systems, among others.

Admission to the degree program is selective. Students should refer to the UK *Bulletin* for general information concerning admission and graduation requirements.

Degree Requirements

The following curriculum meets the requirements for a B.S. in Electrical Engineering, provided the student satisfies UK Core requirements and graduation requirements of the College of Engineering.

Freshman Year

First Semester	Hours
EGR 101 Engineering Exploration I Δ §	1
EGR 102 Fundamentals of Engineering Computing	2
PHY 231 GenUnivPhy PHY 231 or CHE 105 GenColChem I CHE 105 or 170 ● ..	4
PHY 241 General University Physics Laboratory PHY 241 ‡	1
CIS/WRD 110 Composition and Communication I ENG 101	3
MA 113 Calculus I MA 113, MAT 174, 175 or MT 175	4

Second Semester

EGR 103 Engineering Exploration II Δ	2
CIS/WRD 111 Composition and Communication II ENG 102 or 105	3
MA 114 Calculus II MA 114, MAT 184, 185 or MT 185	4
CHE 105 GenColChem I CHE 105 or 170 or PHY 231 GenUnivPhy PHY 231 ● ..	4
UK Core (Social Sciences) or CS 215 Introduction to Program Design, Abstraction, and Problem Solving CS 215	3

Sophomore Year

First Semester	Hours
MA 213 Calculus III MA 213, MAT 213 or MT 275	4

EE Technical Electives ***	3
Supportive Elective*	3
Engineering/Science Elective [E]	3
UK Core (Statistical Inferential Reasoning)	3

***Supportive elective** is to be chosen from any University courses, excluding more elementary versions of required courses, such as precalculus mathematics or PHY 211.

****Graduation Composition and Communication Requirement (GCCR)** course.

[M] **Math/Statistics Elective:** Any upper-division (300-level or higher) math or statistics course excluding MA 308 and MA 310 (3 credit hours total).

[E] **Engineering/Science Electives:** Any engineering, physics, computer science, or math course at the 200-level or higher, other than an electrical engineering course and excluding MA 308, MA 310, and more elementary versions of required courses (6 credit hours total). Cooperative education credit may not be used to satisfy this requirement.

[T] **Technical elective** may be selected from upper-division (300-level or higher) engineering, mathematics, statistics, computer science, physics, or other technically-related fields excluding MA 308, MA 310, EE 305, and more elementary versions of required courses, to be selected in consultation with the academic advisor (3 credit hours total). Cooperative education credit may not be used to satisfy this requirement.

[L] **Electrical Engineering Laboratory Elective:** EE 462G, EE 422G, EE 416G (4 credit hours total).

††EE/CPE 490 is only taught in the fall semester. EE/CPE 491 is only taught in the spring semester.

Δ Both classes must be taken to fulfill UK Core: Arts & Creativity requirement.

§ Transfer students who declare a major will take EGR 112 Engineering Exploration for Transfer Students in place of EGR 101.

● Based on advisor consult

‡ Only if enrolled in PHY 231

Students who take ENG 101 and ENG 101 or 105 should also take one of the following: COM 181, 252, 281, 287.

*****EE Technical Electives** (must be 500-level courses). Courses recommended as electrical engineering technical electives are listed below (each course is 3 credit hours):

EE 511 Introduction to Communication Systems
EE 512 Digital Communication Systems
EE 513 Audio Signals and Systems
EE 517 Advanced Electromechanics

Materials Engineering

College of Engineering

The materials engineer is responsible for the selection, preparation and application of existing materials and for the development of new and improved materials. Materials engineers study the relationships between atomic and/or molecular constitution, microstructure and physical properties including mechanical, thermal, electrical, and optical behavior. Classes of materials include metals, ceramics, polymers, and electronic materials.

Admission to the degree program is selective. Students should refer to the UK *Bulletin* for general information concerning admission and graduation requirements.

Degree Requirements

The following curriculum meets the requirements for a B.S. in Materials Engineering, provided the student satisfies the graduation requirements of the College of Engineering.

Freshman Year

First Semester	Hours
EGR 101 Engineering Exploration I Δ §	1
EGR 102 Fundamentals of Engineering Computing	2

• Based on advisor consult

*** Graduation Composition and Communication Requirement (GCCR) course.

**Technical Electives – Total of 6 credit hours must be chosen. Technical electives are to be selected from a technical discipline, with approval from the Director of Undergraduate Studies. At least 3 credit hours must come from a course with a MSE prefix. MSE 395 (Research) may count for one elective, but not both. Recommended technical electives include but are not limited to:

MSE 395 Independent Work in Materials Engineering
MSE 506 Mechanics of Composite Materials
MSE 531 Powder Metallurgy
MSE/CME 554 Chemical and Physical Processing of Polymer Systems
MSE 556 Introduction to Composite Materials
MSE 569 Electronic Packaging Systems and Manufacturing Processes
MSE 599 Topics in Materials Science and Engineering (Subtitle required)
CHE 580 Topics in Chemistry
CME 542 Electric Power Generation Technologies
MA 322 Matrix Algebra and Its Applications
MA 422 Numerical Solutions of Equations
MA 432G Methods of Applied Mathematics I
ME/MFS 503 Lean Manufacturing Principles and Practices

University of Kentucky is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award associate, baccalaureate, masters, and doctorate degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097, call 404-679-4500, or online at www.sacscoc.org for questions about the accreditation of University of Kentucky.

Mechanical Engineering

College of Engineering

A mechanical engineering training is the broadest among the several fields of engineering. The mechanical engineer uses the techniques of mathematics combined with a specialized knowledge of the thermal and energy sciences, solid and fluid mechanics, and the properties of materials. This information is supplemented by an understanding of manufacturing processes, the design and control of systems, and the economics of the technological community.

Admission to the program is selective. Students should refer to the UK *Bulletin* for general information concerning admission and graduation requirements.

Degree Requirements

The following curriculum meets the requirements for a Bachelor of Science in Mechanical Engineering, provided the student satisfies the graduation requirements of the College of Engineering.
