TASK 8: PROJECT EVALUATION (DUE TUES 5th and THURS 7th of APRIL)

In this task, the instructor will evaluate the current progress of each group’s design project. You score will be entirely based on how far your group has gone in the projected timeline provided in your final proposal and how much is achieved in a given time duration. Be prepared to present what you have so far. You will be notified through e-mail which day your group will meet with the instructor.

Here are some questions the instructor might be interested to know based on your group’s project timeline:

- In what stage should the project be by now?
- In comparison to the milestones presented in your proposal, are you behind on schedule? If so, by how long? Why?
- What have you been working on so far, i.e., what do you have now?
- How would you rate your own progress based on the given milestones?
