

# Summer Internship Opportunities Evaluating Industry Energy Use with the Kentucky Industrial Assessment Center

(KIAC is a US Dept. of Energy Industrial Assessment Center)

KIAC is now accepting applications for student internships  
for summer 2019.

Interns will be working in a team of students and faculty  
*to help manufacturing companies save energy.*

Students will be:

- **Collaborating** with industry personnel to plan for an energy assessment,
- **Visiting** the plant facilities to collect data and find energy savings opportunities
- **Analyzing** plant data and investigating options to determine potential energy savings and estimated implementation costs,
- **Recommending** to industry management on potential energy and financial savings,
- **Tracking** implementation of recommendations through follow-up with company personnel.

The position will be for 40 hrs/wk for 12 weeks in the summer.

Occasional part time work may be available during the semesters and during breaks.

For application information check out
