

Welcome to FYE!

July 2022

The faculty members of the **First-Year Engineering (FYE) Program** are excited to welcome you for the Fall 2022 semester! Over the next several weeks, there are steps that you can take to ensure a smooth transition to the University of Kentucky and prepare for your FYE courses. Please review these items carefully and do not hesitate to contact us if you have questions or concerns.

Here is a concise checklist of important steps that you will need to complete in preparation for the Fall semester. Additional details are provided on the pages that follow.

- Activate your LinkBlue and University e-mail accounts.
- Log-in to CANVAS, and configure your profile.
- Verify that your laptop meets the minimum specifications as stipulated by the College of Engineering.
- Review your options for course textbooks [EGR 102]. Upon arrival, purchase your EGR 102/215 electronic kit.
- Download and install Microsoft Office 365 ProPlus to your laptop; this installation will be at no cost with your UK LinkBlue ID.
- Download and install MATLAB to your laptop (also at no cost); this is a very large installation and students may wish to complete this installation prior to their arrival on campus.

As we approach the start of the Fall semester on August 22, we will provide any required updates both via direct e-mail, and on the [FYE program website](#). We strongly encourage you to regularly monitor your University of Kentucky (@uky.edu) e-mail account as we approach the start of classes.

If you have questions regarding any aspects of FYE preparations, please do not hesitate to contact me at (kalika@uky.edu). Also, all incoming students are encouraged to attend the FYE On-Line Welcome Event on July 19, where we will review this information and the steps needed to prepare for the start of classes (see details below).

Sincerely,

Doug Kalika

Douglass S. Kalika
Professor of Chemical Engineering
Director, First Year Engineering Program

Incoming students in the FYE program should complete the following prior to the first day of classes on August 22:

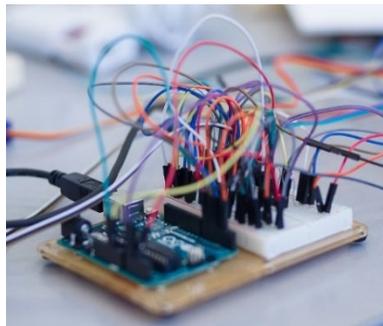

- 1.] As soon as possible, activate your [Link Blue and University](#) email accounts.
- 2.] Log in to [CANVAS](#) (UK's learning management system), and complete the following:
 - Set up your CANVAS profile (Account tab at top left of main toolbar)
 - Set up your notification preferences for class announcements

Please note that CANVAS pages for individual FYE courses will not be available until shortly prior to the start of classes.

- 3.] Review the minimum and preferred specifications for the [College of Engineering laptop computer requirement](#). All students enrolled in FYE courses will be required to have a laptop meeting these specifications.
- 4.] Review the textbook requirements for the FYE courses (see below). Upon your arrival on campus, [visit the UK Bookstore](#) and purchase the required custom electronic kit for EGR 102/215.
- 5.] Visit the UK software download site (<https://download.uky.edu/>) and log-in with your Link Blue credentials. Complete the following software downloads/installations:
 - Download and install [Microsoft Office 365 ProPlus](#)
 - Download and Install [MATLAB](#) using these [instructions](#)

For MATLAB, students should download the most recent version (R2022a).

Permissions for these (no-cost) software downloads will be tied to each student's LinkBlue ID. Permissions for downloads should be fully active by mid-August. Students who encounter difficulty with download access should contact University of Kentucky [Information Technology Support](#).

Textbook Requirements for FYE Courses (Fall 2022):

EGR 101 Engineering Exploration I

EGR 101 (Engineering Exploration I) does not require a textbook for Fall 2022.

EGR 102 Fundamentals of Engineering Computing

The required electronic textbook for EGR 102 is Knoesen and Amirtharajah, *“Introduction to MATLAB”*, published by zyBooks. Sign in or create an account at learn.zybooks.com, enter the zyBook code UKYEGR102FALL2022, and click Subscribe. Subscriptions can be paid either by entering a digital access code purchased through the [UK Bookstore](#), or by paying directly at the zyBooks site; students may wish to compare prices prior to subscribing. The zyBook for the course is available for subscriptions starting on August 9.

IMPORTANT: Students enrolled in EGR 102 will be required to purchase a custom electronic kit from the UK Bookstore; please visit the [UK Bookstore](#) textbook site for current price information. Students are required to purchase the kit prior to the start of classes, and to bring the kit (along with their personal laptop) to the first class meeting for EGR 102. Please note that this kit is a customized Arduino kit specifically configured for EGR 102, and is only available through the UK Bookstore.

EGR 103 Engineering Exploration II

Students enrolled in EGR 103 should consult with the instructor (Prof. Whitney) on the first day of class regarding requirements for the course.

EGR 215 Introduction to the Practice of Engineering for Transfer Students

Students enrolled in EGR 215 will be required to purchase a custom electronic kit from the UK Bookstore; this is the same electronic kit that is required for EGR 102. For students enrolled in both EGR 102 and EGR 215 for the Fall semester, only one kit per individual student is needed. There is no separate textbook requirement for EGR 215.

Note: Students with financial need who cannot afford their FYE textbooks may be eligible for textbook assistance. Please contact your College of Engineering Advisor or [Ms. Jennifer Doerge](#) for more information and eligibility requirements.

In addition, the UK College of Engineering has a very limited number of laptop computers available for loan for the 2022-23 academic year. Eligibility for laptop loans is based on demonstrated financial need and requires approval of the student’s academic advisor. For more information, please contact your College of Engineering advisor, or Ms. Jennifer Doerge.

First-Year Engineering On-line Welcome Event

Tuesday, July 19th at 1:00 PM EDT or 7:00 PM EDT

On July 19, the College of Engineering will host a one-hour on-line webinar event to welcome you to the First-Year Engineering program. During the webinar, you'll have a chance to meet FYE faculty and college support staff, learn about FYE courses, check laptop and software requirements, and review steps needed to prepare for the start of classes. Two identical one-hour sessions will be offered, and all incoming students are encouraged to attend.

To participate, please register at: <https://enr.uky.edu/livechat>
