

C.T. Wolfe

C.T. Wolfe is currently an imaging scientist with Badger Technologies in Nicholasville, KY. His work entails using traditional Computer Vision (CV) techniques as well as AI implementations for detection and classification of objects for robots in a retail environment. Previously, he had worked over 25 years at Lexmark International, Inc. developing various hardware embedded solutions for Lexmark's Printer and All-In-One portfolio. He also held various management roles in Product Safety, Acoustics, EMC, and Printer Controller Development. He began his career working for McDonnell Douglas (now Boeing) in their Avionics Labs working on various military fighter jets. He holds B.S. and Ph.D. degrees in Electrical Engineering from the University of Kentucky and an M.S. degree in Electrical Engineering from University of Missouri – Rolla.
